MISSION

Our team of multi-professional education experts and lecturers realizes our clients' education needs according to practical and theoretical knowledge. We inform, develop and implement innovative training projects, based on DIN:ISO 9001:2015 certification.

Our pedagogical and professionally trained staff focuses on our students' demands and also their social-pedagogical needs. All our training projects involve on-site practical training, internships and field trips. Our daily work aims to improve our clients' competitiveness!

We do live education!

JOB TRAINING

State qualified nurse

Qualified nurses work in various institutions of healthcare. They plan, implement and evaluate nursing processes over the whole lifespan. The job training of 3 years includes theoretical training at the vocational school and practical training in hospitals, geriatric nursing companies and pediatric centers. The exam qualifies for further trainings such as intensive care, wound care manager or management positions in health care. Within the final year of the job training, a specialized exam in geriatric nursing is possible.

Nursing assistant (state approved training, 2 years)

The job training includes skills and knowledge to care for and advise elderly, handicapped and/or people suffering from illnesses. Nursing assistants support nurses in their daily work.

Basic assistants in elderly nursing (1 year)

This job qualification includes basic knowledge in nursing and aims to qualify people searching for new job options in the field of elderly care. The training can also give orientation to do a follow-up state approved job training.

Social assistant (state approved training, 2 years)

The job training includes skills and knowledge to assist in social work sectors such as childcare, elderly care or work with the handicapped. Social assistants support daily routines i.g. doctor's visits, preparing meals, schedule and accompany daily activities etc.

The exam qualifies for further education in state qualified nursing or nursery school teaching.

Support staff in nursing homes (§ 53c SGB XI)

Support staff in nursing homes work additionally to nursing assistants and nurses. They assist elderly people in their daily routine, support their hobbies and train remaining resources. The qualification is based on state approved regulations.

FURTHER TRAINING

Health professions

We are authorized by the Saxon Ministry of Social Affairs to implement further training for health professions. Further training can help to develop new career options and get involved with leading positions in the health care sector. The trainings include e.g. practical trainer, nursing manager and hygiene manager.

In-house seminars

Our trainings can also be booked as inhouse seminars. Our staff develops and implements company oriented trainings, focusing on the needs of the companies and their employees. We analyze educational demands and create modern seminar strategies, using creative methods and individualized training materials.

Informal caregivers

Being an informal caregiver is especially challenging for people having no nursing knowledge. There are physical as well as psychological burdens when taking care of a family member needing nursing assistance. High costs and bureaucracy are an additional workload.

In cooperation with the health care insurance AOK PLUS we offer and organize trainings for informal caregivers to inform about practical nursing knowledge and give useful advice for the daily tasks of caregiving at home.
